24	25	26	27	28	29	30 W

W (Worldsday, a World Holiday) equals 31 December (365th day) and follows 30 December every year.
W (Leapyear Day, another World Holiday) equals 31 June and follows 30 June in leap years.

In this Improved Calendar:

- Every year is the same.
- The quarters are equal: each quarter has exactly 91 days, 13 weeks or 3 months; the four quarters are identical in form.
- Each month has 26 weekdays, plus Sundays.
- Each year begins on Sunday, 1 January; each working year begins on Monday, 2 January.
- Each quarter begins on Sunday, ends on Saturday.
- The calendar is stabilized and made perpetual by ending the year with a 365th day following 30 December each year. This additional day is dated "W," which equals 31 December, and called Worldsday, a year-end world holiday. Leapyear Day is similarly added at the end of the second quarter. It is likewise dated "W," which equals 31 June, and called Leapyear Day, another world holiday in leap years.
